STATE REGISTRATION BOARD

FOR

PROFESSIONAL ENGINEERS

•

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF PUBLIC INSTRUCTION

HARRISBURG

FOREWORD

Herein is contained a list of professional engineers and surveyors registered in accordance with the Act of the General Assembly, No. 415, approved May 6, 1927 as amended, and No. 367, approved May 23, 1945, and in good standing on the date of this issue.

It is the purpose of the Board to secure the registration of all qualified engineers and surveyors. Any engineer or surveyor whose practice is within the scope of the law and who is not registered is practicing illegally. The Registration Board will welcome any information concerning persons engaged in such illegal practice. Persons so reported will be referred to the Law Enforcement Division for investigation and prosecution if the conditions are found to warrant it. The cooperation of registrants to this end is earnestly desired.

Francis B. Haas

Superintendent of Public Instruction

Code of Ethics of The Engineering Profession

It shall be considered unprofessional and inconsistent with honorable and dignified bearing for any Professional Engineer or Surveyor:

1. To act for his client or employer in professional matters otherwise than as a faithful agent or trustee, or to accept any remuneration other than his stated recompense for services rendered.

2. To attempt to injure falsely or maliciously, directly or indirectly, the professional reputation, prospects or business of anyone.

3. To attempt to supplant another Engineer or Surveyor after definite steps have been taken toward his employment.

4. To compete with another Engineer or Surveyor for employment by the use of unethical practices.

5. To review the work of another Engineer or Surveyor for the same client, except with the knowledge of such Engineer or Surveyor, or unless the connection of such Engineer or Surveyor with the work has terminated.

6. To attempt to obtain or render technical services or assistance without fair and just compensation commensurate with the services rendered.

7. To advertise in self-laudatory language, or in any other manner, derogatory to the dignity of the profession.

8. To attempt to practice in any field of engineering in which the registrant is not proficient.

Professional Engineers Registration Law

No. 367

AN ACT

Relating to and regulating the practice of the profession of engineering; including civil engineering, mechanical engineering, electrical engineering, mining engineering, chemical engineering, surveying and constituent parts and combinations thereof as herein defined; providing for the licensing and registration of persons practicing said profession, and the certification of engineers in training, and the suspension and revocation of said licenses, registrations and certifications for violation of this act; prescribing the powers and duties of the State Registration Board for Professional Engineers, the Department of Public Instruction and the courts; prescribing penalties; and repealing existing laws.

Professional Engineers Registration Law.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. *Short Title.*—This act shall be known and may be cited as the "Professional Engineers Registration Law."

Section 2. *Definitions.*—As used in this act.—

(a) "Practice of Engineering" means the practice of the profession which engages in the application of mathematics and the physical sciences, and in the utilization of the forces, energies and materials of nature and in the measurement and delineation of the earth's surface, for the development, production and functioning of engineering processes, apparatus, machines, equipment, facilities, structures, works or utilities, or any combinations, or aggregations thereof, employed in or devoted to private enterprises or uses. Such practice includes consultation, investigation, research, surveys, planning, designing, direction, supervision and such other services or acts as are a necessary part of such practice. The term "practice of engineering" comprehends the practice of civil engineering, mechanical engineering, electrical engineering, mining engineering, chemical engineering, surveying or any constituent part or parts of these, or combination thereof, such as architectural engineering, ceramic engineering, industrial engineering, metallurgical engineering, petroleum and natural gas engineering, sanitary engineering and structural engineering, the pursuit of any of which affect life, health, or property, or the public welfare. Said practice also includes the doing of such architectural work as is incidental to the practice of engineering.

(b) "Engineer-in-Training" means a candidate for licensure as a professional engineer, who has been granted a certificate as an engineer-in-training by reason of graduation from an approved institution or college, or after successfully passing the prescribed written examination in fundamental engineering subjects, and who

shall be eligible upon the completion of the requisite years of experience in engineering, under the supervision of a professional engineer, or similarly qualified engineer, for the final examination prescribed for licensure as a professional engineer.

(c) "Practice of Surveying" means the practice of that branch of the profession of engineering which makes surveys for the determination of area, and for the establishment or reestablishment of land boundaries and the subdivision and plotting of land, and who makes surveys for the establishment of lines, grades or elevations for carrying out engineering work, and who, in connection therewith, determines quantities of materials and prepares plans or specifications for minor work not involving safety to life or health, and who determines quantities or who makes estimates for proposed work, or for work under construction, or work that is completed, or who, in addition to the foregoing, makes estimates of quantities of mineral or minerals in place, or that have been removed.

(d) "Professional Engineer" means an individual licensed and registered under the laws of this Commonwealth to engage in the practice of engineering.

(e) "Surveyor" means an individual licensed and registered under the laws of this Commonwealth to engage in the practice of surveying. A surveyor may not practice any other branch of engineering.

(f) "Board" means The State Registration Board for Professional Engineers.

(g) "Department" means the Department of Public Instruction.

(h) "Responsible Charge" means such degree of competence and accountability gained by technical education and experience of a grade and character as is sufficient to qualify an individual to personally and independently engage in and be entrusted with the work involved in the practice of engineering or surveying.

Section 3. *Practice of Engineering or Surveying Without Licensure and Registration Prohibited.*—In order to safeguard life, health or property and to promote the general welfare, it is unlawful for any person to engage, or to offer to engage in the practice of engineering in this Commonwealth, unless he is licensed and registered under the laws of this Commonwealth as a professional engineer, or for any person to engage or to offer to engage in the practice of surveying, unless he is licensed and registered under the laws of this Commonwealth as a surveyor, or as a professional engineer. It is unlawful for any person to use in connection with his name or to otherwise assume, use or advertise any title or description

tending to convey the impression that he is a professional engineer, or a surveyor, or that he is engaged in the practice of engineering or surveying unless such person is licensed and registered with the board.

Section 4. *General Powers of Board.*—The board shall have power—

(a) Approval of Institutions and Colleges.—To investigate and to approve or disapprove institutions and colleges of this State, and other states, territories and countries for the education of students desiring to be licensed to engage in the practice of engineering, and to revoke or suspend approvals where such institutions and colleges no longer are deemed proper.

(b) Licensing Professional Engineers.—To provide for and to regulate the licensing, and to license to engage in the practice of engineering any person of good character and repute who is a citizen of the United States, or has declared his intention of becoming a citizen thereof, at least twenty-five years of age, and who speaks and writes the English language, if such person either—

(1) Holds an unexpired license or certificate of registration issued to him by proper authority of some other state in which the requirements and qualifications to engage in the practice of engineering are at least equal to the standards of this Commonwealth: Provided, however, That such other state or territory shall similarly license or register professional engineers licensed and registered in this Commonwealth. A person may be licensed under this subdivision without examination.

(2) Holds a certificate of qualifications issued by the National Bureau of Engineering Registration of the National Council of State Boards of Engineering Examiners: Provided, The requirements and qualifications of said bodies to engage in the practice of engineering are at least equal to the standards of this Commonwealth. A person may be licensed under this subdivision without examination.

In carrying into effect clauses (1) and (2) of subdivision (b) of this section the board may in its discretion enter into agreements for reciprocity with the National Council of State Boards of Engineering Examiners and with states under such rules and regulations as the board may prescribe.

(3) Has had four or more years' experience in engineering work under the supervision of a professional engineer, or a similarly qualified engineer of a grade or character to fit him to assume responsible charge of the work involved in the practice of engineering, and is either an engineer-in-training or a graduate in engi-

neering of an approved institution or college having a course in engineering of four or more years, or has had ten years of experience in engineering work, seven years of which shall have been in teaching or study in an approved institution or college, and three years of which shall have been active experience in engineering work under the supervision of a professional engineer, or a similarly qualified engineer of a grade or character to fit him to assume responsible charge of the work involved in the practice of engineering, and who is a graduate of an approved institution or college having a course in engineering of four or more years and who in either event successfully passes a written examination prescribed by the board in engineering subjects. In the case of the examination of an engineer-in-training his examination shall be directed and limited to those matters which will test the applicant's ability to apply the principles of engineering to the actual practice of engineering. In the case of an applicant who is not an engineer-in-training the examination shall be for the purpose of testing the applicant's knowledge of fundamental engineering subjects, including mathematics and the physical sciences and those matters which will test the applicant's ability to apply the principles of engineering to the actual practice of engineering.

(4) Has had twelve or more years of active experience in engineering work, at least eight years of which shall have been under the supervision of a professional engineer, or similarly qualified engineer of a grade and character to fit him to assume responsible charge of the work involved in the practice of engineering, and who successfully passes a written examination prescribed by the board for the purpose of testing the applicant's knowledge of fundamental engineering subjects, including mathematics and the physical sciences and those matters which will test the applicant's ability to apply the principles of engineering to the actual practice of engineering.

(c) Examination and Certification of Engineers-in-Training.—To provide for and to regulate the examination of any person who has had four or more years' experience in engineering work, and who produces satisfactory evidence to show knowledge, skill and education approximating that attained through graduation from an approved institution or college, and to issue to any such person who successfully passes such examination a certificate showing that he has successfully passed this portion of the professional examination and is recognized as an engineer-in-training. The examination of applicants as engineers-in-training shall be designed to permit an applicant for licensure as a professional engineer to take his examination in two stages. The examination for certification as an engineer-in-training shall be for the purpose of testing the appli-

cant's knowledge of fundamental engineering subjects, including mathematics and the physical sciences. Satisfactory passing of this portion of the examination shall constitute a credit for the life of the applicant or until he is licensed under this act as a professional engineer.

Any person who is a graduate in engineering from an approved institution or college having a course of four years or more in engineering shall be granted a certificate as an engineer-in-training without examination.

(d) Licensing of Surveyors.—To provide for and to regulate the licensing and to license to engage in the practice of surveying any person of good character and repute who is a citizen of the United States, or has declared his intention of becoming a citizen thereof, at least twenty-one years of age, and who speaks and writes the English language, if such person

(1) Has graduated in engineering from an approved institution or college having an engineering course of not less than four years, and has had two or more years' experience in surveying under the supervision of a professional engineer or surveyor of a character indicating that the applicant is competent to assume responsible charge of the practice of surveying. A person may be licensed under this subdivision without examination.

(2) Has had six or more years' active experience in surveying work under the supervision of a professional engineer or surveyor of a character indicating that the applicant is competent to assume responsible charge of the work involved in the practice of surveying and who successfully passes a written examination prescribed by the board in surveying subjects.

(e) Investigations of Applications; Determination of Competency of Applicants.—To investigate the allegations contained in any application for licensure or certification under this act in order to determine the truth of such allegations and to determine the competency of any person applying for licensure to assume responsible charge of the work involved in the practice of engineering or surveying, such competency to be determined by the grade and character of the engineering work, or the grade and character of the surveying work actually performed. The mere execution as a contractor of work designed by a professional engineer, or the supervision of the construction of such work as a foreman or superintendent, or the operation or maintenance of machinery or equipment, or work performed as a salesman of engineering equipment or apparatus, shall not be deemed to be active practice in engineering, unless such work has involved the actual practice of engineering. Engineering and surveying work performed under the super-

vision of a professional engineer or surveyor shall be given full credit. Whenever the board determines otherwise than by examination, that an applicant has not produced sufficient evidence to show that he is competent to be placed in responsible charge and shall refuse to examine or to license such applicant, it shall set forth in writing its findings and the reasons for its conclusions and furnish a copy thereof to the applicant.

(f) Examinations; Fees.—To prescribe the subjects, manner, time and place of examinations for licenses as professional engineers and surveyors, and for certificates for engineers-in-training, and the filing of applications for such examinations, and to conduct and provide for the conduct of such examinations, to make written reports of such examinations, which reports shall be preserved for a period of not less than three years, to collect such fees for such examinations, and for licenses and certificates issued without examination, as may be fixed according to law, and to issue licenses and certificates to such persons as successfully pass such examinations.

(g) Annual Registrations; Fees.—To provide for, regulate and require all persons licensed in accordance with the provisions of this act and all persons licensed and registered under prior laws of this Commonwealth, relating to the licensing of professional engineers and surveyors, to register annually with the board, to prescribe the form of such registration, and the payment of such annual registration fee, as shall be fixed according to law, to issue annual registration to such persons and to suspend or revoke the license or registration of such persons as fail, refuse or neglect to so register, or pay such fee within such time as the board shall prescribe by its rules and regulations, and to reinstate licenses and registrations of persons who shall thereafter pay such registration fees in accordance with the rules and regulations of the board.

(h) Roster of Registrants.—To keep a roster showing the names and addresses of, the places of business of all professional engineers and surveyors licensed under this act, and under prior laws, and registered by the board, which roster shall be published in booklet form by the board at least once every two years. Copies of the roster shall be mailed to each registered person and be furnished to other persons upon request.

(i) Suspension and Revocation of Licenses; Registrations and Certificates; Reinstatements.—To suspend or revoke the license and registration of any professional engineer or surveyor or the certificate of any engineer-in-training, who is found guilty by the board, by a majority vote of all its members, of the practice of any fraud, deceit or misrepresentation in obtaining his license, certification or registration, or of gross negligence, incompetency or misconduct in

the practice of engineering, or in the practice of surveying, or of violation of the code of ethics of the engineering profession, and to reinstate licenses, registrations and certificates in any cases where a majority of all the members of the board shall determine the same to be just and proper.

(j) Financial Requirements of Board.—To submit biennially to the department an estimate of the financial requirements of the board for administrative, investigative, legal and miscellaneous expenses.

(k) Administration and Enforcement of Laws.—To administer and enforce the laws of the Commonwealth relating to the practice of engineering and surveying, and to instruct and require its agents to bring prosecutions for unauthorized and unlawful practices.

(l) Minutes and Records.—To keep minutes and records of all its transactions and proceedings. Copies thereof duly certified by the secretary of the board shall be received in evidence in all courts and elsewhere.

(m) Member of National Council of State Boards of Engineering Examiners; Dues.—To become a member of the National Council of State Boards of Engineering Examiners, and to pay such dues as said council shall establish, and to send a delegate to the annual meeting of said council, and to defray his expenses.

(n) Administrative Rules and Regulations.—To adopt, promulgate and enforce such administrative rules and regulations, not inconsistent with this act, as are deemed necessary and proper by the board to carry into effect the powers conferred by this act.

Section 5. Exemption from Licensure and Registration.—This act shall not be construed to require licensure and registration in the following cases:

(a) The practice of engineering or surveying by any person who acts under the supervision of a professional engineer or surveyor, or by an employe of a person lawfully engaged in the practice of engineering or surveying and who, in either event, does not assume responsible charge of design or supervision;

(b) The practice of engineering or surveying, not exceeding thirty days in the aggregate in one calendar year, by a nonresident not having a place of business in this Commonwealth, if such person is legally qualified to engage in the practice of engineering or surveying in the state or territory of his residence: Provided, That standards of such state or territory are at least equal to the standards of this Commonwealth;

(c) The practice of engineering or surveying by officers and employes of the United States Government for the said government;

(d) The practice of engineering or surveying by a regular employe of a public utility company, as defined by the Pennsylvania Public Utility Law in connection with the facilities of such public utility, which are subject to regulation by the Pennsylvania Public Utility Commission: Provided, That such public utility shall employ at least one professional engineer, who shall be in responsible charge of such utility's engineering work;

(e) The practice of architecture by a duly registered architect, and the doing of such engineering work as is incidental to his architectural work;

(f) The practice of engineering or land surveying by any person or by any employe of any copartnership, association or corporation upon property owned by such person or such copartnership, association or corporation, unless such practice affects the public safety or health or the property of some other person.

Section 6. *Practice by Firms and Corporations.*—The practice of engineering and of surveying being the function of an individual or of individuals working in concerted effort, it shall be unlawful for any firm or corporation to engage in such practice, or to offer to practice, or to assume use or advertise any title or description conveying the impression that such firm or corporation is engaged in or is offering to practice such profession, unless the directing heads and employes of such firm or corporation in responsible charge of its activities in the practice of such profession are licensed and registered in conformity with the requirements of this act, and whose name and seal shall be stamped on all plans, specification plates and reports issued by such firm or corporation.

Section 7. *Seal of Registrants.*—Each person, registered under this act, shall obtain a seal of a design authorized by the board which shall bear the registrant's name and number and the legend "Registered Professional Engineer" or "Registered Surveyor." Such seal, or a facsimile imprint of same, shall be stamped on all plans, specifications, plates and reports issued by a professional engineer or surveyor.

It shall be unlawful for any person to use such seal during the period the license or registration of the holder thereof has been suspended or revoked, or to use a seal of any design not approved by the board.

Section 8. *Procedure for the Suspension and Revocation of Licenses and Registrations; Appeals.*—Before the license of any licensee, or any registration, or any certification is suspended or revoked by

the board, a written copy of the complaint made shall be furnished to the licensee, registrant, or person against whom the same is directed, and an opportunity be afforded him to be heard before the board personally and by counsel. At least ten days' written notice of the time and place of such hearing shall be given the licensee, registrant or person by registered mail addressed to the post office address as shown on the annual registration, or other record, or information in possession of the board.

Any person aggrieved by the action of the board in suspending or revoking a license, registration or certification or by any other action of the board, which is alleged to be improper, unreasonable or unlawful may appeal from such action of the board, in writing, to the Court of Common Pleas of Dauphin County.

Appeals from suspensions and revocations of licenses, registrations and certifications must be taken within thirty days after such suspension or revocation, of which action, immediate notice shall be given by the board to the licensee, registrant or person by registered mail addressed as above provided. In the case of appeals from other actions of the board, the appeal may be taken at any time by the person aggrieved by such action. No such appeal shall act as supersedeas unless specially allowed by the court.

Appeals shall be taken by serving upon the board written notice of such appeal, together with reasons for such appeal. Such service shall be made by filing the said notice of appeal in the office of the board.

Within thirty days after the service of such notice of appeal, the board shall file with the prothonotary of the said court of common pleas, a transcript of the record of the proceedings. Notice of the filing of said transcript, with the term and number to which filed, shall be forthwith given by the board to the appellant and as well to the party or parties, if any, upon whose complaint the proceedings before the board were instituted. The cost of the said transcript at twenty-five cents per folio and one dollar for the certification shall be entered as part of the record costs in the cause to be paid as the court may direct.

The court, upon application by the board or the appellant, shall fix a time and place for hearing, at which time or at any adjournment thereof, the appeal shall be heard by the judge or judges of the court without a jury. The court shall affirm the decision of the board, unless it shall find the same is in violation of the constitutional rights of the appellant, or is not in accordance with law, or was made upon unlawful procedure, or that any finding of fact made by the board and necessary to support its adjudication is not supported by substantial evidence. If the adjudication of the board

is not affirmed the court may set aside or modify it in whole or in part, or may remand the proceeding to the board for further disposition in accordance with the order of court.

Either party may appeal from the decision of the Court of Common Pleas of Dauphin County to the Superior Court. Such appeals shall be taken and prosecuted, in the same manner, and with like effect, as is provided by law in other cases of appeal to the Superior Court, and the records certified to the Superior Court shall contain all that was before the court of common pleas. The decree of the Superior Court shall be final and conclusive.

Section 9. *Fees.*—The fee for an applicant for licensure as a professional engineer or surveyor, including examination, and for examination or certification, or both, as an engineer-in-training, and for annual registrations, as in this act required, shall be fixed by the Department in accordance with existing law. All fees collected under the provisions of this act shall be received by the Department and shall be paid into the State Treasury through the Department of Revenue for the use of the General Fund of the Commonwealth.

Section 10. *Status of Existing Licensees and Registrants Preserved.*—Any person, licensed or legally authorized to practice as a professional engineer or surveyor in this Commonwealth at the time this act takes effect, shall thereafter continue to possess the same rights and privileges with respect to the practice of engineering or surveying without being required to be licensed anew under the provisions of this act, subject, however, to the power of the board as provided in this act to suspend or revoke the license of any such person for any of the causes set forth in this act, and subject to the power of the board to require any such person to register annually with the board as provided in this act.

Section 11. *Penalties.*—Whoever shall engage in the practice of engineering or the practice of surveying without being licensed and registered as required by this act, or exempted therefrom, as provided in this act, or shall present or attempt to use, as his own, the license or certificate of registration of another, or shall give any false or forged evidence of any kind to the board, or to any member thereof, in order to obtain a license or registration as a professional engineer or surveyor or a certificate as an engineer-in-training, or shall use any expired, suspended or revoked certificate of registration, or shall otherwise violate the provisions of this act, shall be guilty of a misdemeanor, and upon conviction thereof, shall be sentenced to pay a fine not exceeding five hundred dollars, or suffer imprisonment, not exceeding three months, or both.

Repealer.

Section 12. *Repeal.*—The act approved the sixth day of May, one thousand nine hundred and twenty-seven (Pamphlet Laws, eight hundred twenty), is hereby repealed; except that said act shall not be repealed in so far as applications for licensure shall be made thereunder by honorably discharged members of the armed forces of the United States, and for such purposes the said act shall remain in full force and effect until two years after proclamation by the President of the United States that hostilities in all wars in which the United States is now engaged have ceased.

Act effective June 30, 1946.

Section 13. *Effective Date.*—This act shall become effective June thirtieth, one thousand nine hundred and forty-six.

APPROVED—The 23rd day of May, A. D. 1945.

EDWARD MARTIN

The foregoing is a true and correct copy of Act of the General Assembly No. 367.

C. M. MORRISON,
Secretary of the Commonwealth.
